Assignment

Application Name: Simple Command Line Calculator

Responsibilities:

- Develop a simple command line calculator using TypeScript, Node.js and Inquirer.

Application Name: Number Guessing Game

Responsibilities:

- This guess the number game is a short TypeScript/Node.js project that allows the user to guess the number generated by the computer.
- There are also several ways to alter the game, like adding more rounds or displaying the score. It's quite simple and uses the random function to generate a number.

Application Name: ATM

Responsibilities:

- This somewhat complex TypeScript/Node.js project is a console-based application.
- When the system starts the user is prompted with a user id and user pin.
- After entering the details successfully, the ATM functionalities are unlocked.
- All the user data is generated randomly.
